PROJECTS

Deadline Reminder — Full-Stack Web App

- Built a full-stack task manager (React, Firebase) with secure auth, supporting real-time updates across multiple concurrent sessions.
- Implemented CRUD operations with priority-based sorting, reducing task lookup time by organizing deadlines into 3 automated status categories (Overdue, Due Soon, Upcoming).
- Designed a fully responsive UI deployed on Firebase Hosting with sub-2s load times.

Gym Management SaaS — Multi-Tenant Full-Stack Platform

- Built a multi-tenant SaaS platform (React, Node.js, MongoDB) supporting 3+ independent gym tenants with role-based access for admins, trainers, and members.
- Engineered tenant-isolation middleware and JWT auth ensuring zero cross-tenant data leakage across all active instances.
- Integrated push notifications (OneSignal) and email alerts (Nodemailer), deployed backend on AWS EC2 behind Nginx with 99%+ uptime during testing.
- Configured custom domain routing via DuckDNS, managed environment variables, and handled full production server setup independently.
